

Private Aircraft Handling Service

YOUR TRUSTED PARTNER ON THE GROUND

Reliable partners are essential – especially on business trips. As a licensed handling company, our job is to offer handling services to business jets and helicopters when visiting Zurich airport.

From booking airport slots to taking care of the refueling of the aircraft, we also handle the supply of fresh water and toilet service. You can be certain that our handling services fully meet all airport and industry criteria, our committed and trained staff will be delighted to assist you by escorting your VIP passengers and crews from the aircraft to the terminal, helping with the Swiss customs and entry formalities at the General Aviation Center (GAC).

Our on-board meals are prepared by first-class chefs and composed to be part of enjoying the flight. Our food services are provided by select catering companies. We also take care of any crew hotel reservations at airlines rates and we will provide transfer between airport and hotel whenever you need it.

Pilots and flight crews will enjoy our fully furnished crew lounge and passengers will be pampered with our exclusive VIP service. Assisting you efficiently during your stay in Zurich is our mission.

If needed, we also take it a step away from the airport by arranging limousine or helicopter transfers and any other special necessary services for your passengers. To prevent anything from getting in the way of a prompt connecting flight, as a concierge, we are here to make your expectations become a reality.

Customer satisfaction is our top priority, this as well as complying with all airport service guidelines and regulations. For this reason we design our services to be flexible enough to meet your individual needs and to make traveling through Zurich airport as pleasant and efficient as possible.
